BASE 6eb9ace

```
430 var loopCharacteristics =  
    getBusinessObject(element).loopCharacteristics;  
    ⋮  
435 if (isUndefined(entry.options.isSequential) ||  
    !loopCharacteristics) {  
436     loopCharacteristics = self._moddle.create(  
        entry.options.loopCharacteristics);  
437 }  
438  
439 loopCharacteristics.isSequential =  
    entry.options.isSequential;  
    ⋮  
441 self._modeling.updateProperties(element,  
    { loopCharacteristics: loopCharacteristics });
```

Report claims

Turn 2

10 claims, each citing
its tool records

1 Tests existence,
not the loop type
**Create the requested
type first.**

2 Mutates the existing
object read at 430

3 Same object passed back,
effect needs execution
